WHO WE ARE

Established in 2011, TalTeam Inc. is an SBA certified trusted WOSB top-tier Integrated Services Provider delivering cutting-edge technology solutions and strategic consulting services. With a sustained 36% year-over-year growth, TalTeam has built a reputation for excellence across both government and commercial sectors.

Backed by 14+ years of proven success and a leadership team that blends deep industry experience with a bold vision for the future, TalTeam combines the agility of a small business with the operational rigor and scalability of a large enterprise. TalTeam is committed to quality, transparency, and performance making us a reliable partner for mission-critical initiatives.

WHY US

- **Visionary Leadership -** A seasoned executive team that leads with a bold, innovation-first mindset embracing AI/ML technology and delivering tailored solutions that anticipate tomorrow's challenges today.
- **Proactive Risk Mitigation -** A disciplined approach to identifying and managing risk across all engagements.
- **Responsive, High-Quality Service Delivery** - Timely, effective, and client-focused support that exceeds expectations.
- **Unwavering Commitment to Quality -** Rigorous standards and continuous improvement embedded in every process.
- **Financial Strength & Talent Retention -** Stable financial foundation with strategic incentives to retain top talent and ensure service continuity.
- **Recognized Thought Leadership -** Expertise in workforce planning and project management that drives innovation and results.

Dept of Treasury - IRS

National Institutes of Health

PROJECT SHOWCASE

Supported the FAA on NAVTAC - 1, 2, and 3, AMSIS, ASH - 1, 2, and 3 in delivering enterprise application development and testing services in collaboration with TetraTech. TalTeam consistently secured and retained 90% of top-tier talent ensuring continuity and quality in program delivery.

Primed FDIC BISS (CORHQ-19-G-0402) BI Operations, Enhancements and New Development by modernizing anomaly detection workflows, enabling faster decision-making and risk mitigation. The deployment of intuitive analytics dashboards led to a 220% increase in user engagement over three years.

For a leading Healthcare Payer, implemented a scalable, secure DDMS on AWS, integrating Amazon Textract and Comprehend for automated data extraction and NLP-based document querying, significantly reducing manual effort and errors. The system uses microservices architecture and Amazon Bedrock's Generative AI to enable conversational search and real-time insights, enhancing decision-making and audit readiness.

For a leading Healthcare Payer, implemented a deep learning-based system using Long Short-Term Memory (LTSM) networks to analyze over 4 million expense records, outperforming traditional models in identifying anomalies and seasonal patterns.

At a multinational telecom / media company, deployed intelligent RPA solutions using Blue Prism, Automation Anywhere, and UiPath transforming high-volume, manual operations into streamlined, automated workflows with measurable ROI.

At a multinational telecom / media company, implemented a Google Cloud NLP-powered chatbot within Salesforce Lightning, enabling customers to resolve routine inquiries like troubleshooting, payment extensions, and service upgrades without live agent intervention.

At the National Library of Medicine, standardized interoperable access to clinical value sets for CMS quality reporting and measure development. Leveraged FHIR to standardize and accelerate value set operations. Provided public API endpoints for direct and reliable access to value set data.

IT services for the Library of Congress, including the National Audio-Visual Conservation Center and the National Library Service for the Blind are being delivered under an IDIQ contract supporting the full lifecycle of IT investments and projects. These services span planning, development, modernization, and operations across key areas such as software, platforms, infrastructure, communications, data centers, and user support.

Supported the Department of Treasury-IRS in developing and enhancing data delivery service models and technical components to improve its Enterprise Data solution. Our team also provided strategic guidance on designing, deploying, and sustaining data services for internal and external stakeholders, aligned with the IRS Data Delivery Services (DDS) Data Strategy.

Provided information engineering, enterprise architecture, and agile software development services to the Bureau of Labor Statistics (BLS). Our solutions experts collaborated with the BLS Office of Compensation and Working Conditions to deliver full lifecycle software development, database design, and advanced analytics across a broad range of employee metrics.

Provided mission-critical technical operations support to DHS - USCIS, including monitoring, coordinating, remediating, and reporting on network incidents, maintenance, and outages across its infrastructure systems. This effort strengthened oversight and ensured seamless continuity of support for USCIS's critical systems.

Provided software development, integration, and testing services to the USPTO's Patent Trial and Appeal Board (PTAB), supporting configuration management, production support, and software maintenance. Enhanced APIs with real-time synchronization to the End-to-End system, enabling advanced search, bulk downloads, and improved access to America Invents Act (AIA) trial documents.

Support the Census Bureau's Geography Division with software development, operations, and maintenance of large-scale databases and applications, including the Master Address File/Topologically Integrated Geographic Encoding and Referencing (MAF/TIGER) database. Our services ensure reliable performance and data integrity across both batch and interactive systems critical to national geographic data management.
